Learn RPA: Future-ready skills

For students and faculty

Enterprises are adopting RPA at a rapid scale to achieve cost, service quality, and productivity gains.

The demand for RPA skills has increased exponentially and students with necessary RPA skills are in high demand.

As the world's most advanced RPA platform provider, we empower educational institutions and faculty to equip students with the future-ready skills they need to succeed and get **hired**

Faculty or educator? Shape the future of work

Academic Alliance Program

The Automation Anywhere Academic Alliance program enables academic institutions to create and deliver impactful RPA curricula for students to learn future-ready skills or pursue as a course of study.

Universities, community colleges, extension programs, and workforce re-skilling institutions partner with Automation Anywhere University to deliver foundational RPA knowledge, teach hands-on bot-building skills, and provide an avenue to get certified in RPA.

Learning trails

Build your RPA skills in-campus

Enroll your institution and learn how to use the Automation Anywhere RPA platform in the classroom while earning RPA credentials.

Set up your RPA curriculum

Get access to exclusive academia learning content to effectively teach and integrate RPA as part of your core curriculum for your students and to provide them with future-ready skills.

Learning trails

Automation Anywhere RPA Essentials for Students (Automation 360)

This learning trail is designed for university students aspiring to acquire the Automation Anywhere Certified Essentials RPA Professional (Automation 360) - 2022 certification.

The trail enables you to embark upon your RPA journey starting from an introduction to Robotic Process Automation (RPA) to building basic bots.

You will learn

- how business processes are evaluated for automation
- how building bots can help automate and solve time consuming and repetitive business processes.
- how to use recorders to capture actions and
- how you can use the various action packages available within Automation 360 to automate and solve complex, repetitive, time consuming business processes. As a next step, you will learn how to reuse bots for scalability.

Learning will be reinforced through concepts and walk through demos. We recommend that you take full advantage of our Community Edition (CE) to practice the bot building activities

Community Edition

Bring RPA to the classroom

The Automation Anywhere University Academic Alliance is an industry-academia partnership enabling academic institutions to deliver an impactful, blended RPA course offering and hands-on practice with no-cost licenses of Automation Anywhere software.

Universities, community colleges, extension programs, and workforce re-skilling institutions partner with Automation Anywhere University to deliver foundational RPA knowledge, teach hands-on bot-building skills, and award RPA certification to students.

Benefits

For students:

- Access to the Automation Anywhere Enterprise Platform, training, and globally recognized Essentials certification
- Stand out for internships and full-time roles with an in-demand certification applicable across many industries
- Build your personal brand with an opportunity to become an A-Lister, a student RPA ambassador
- Build your bots and make them available on our Bot Store, the world's leading marketplace for bots and Digital Workers

For institutions:

- Offer programs and curriculum that prepares students for the future of work
- Boost hiring rates with future-ready jobs
- Establish Bot Labs on campus to offer exciting and ongoing learning opportunities for students and faculty
- Provide a blended experience of digital and classroom learning with free Essentials certification
- Flexible learning formats: implement as core curriculum, as extension programs, or as continuing education programs

Accredited Training Partners

Accredited by Automation Anywhere Inc., our global network of training partners delivers in-classroom and virtual RPA training instruction to customers and partners worldwide.
